

## HTS 1

Heat Exchanger Unit with circulation pump (industrial plastic material). Housing, atmospheric open expansion tank and heat exchanger.For externally closed applications.

#/#/

## Technical data according to DIN 12876

| from Serial-No.:                            | 395094                 | 1.0/20                  |
|---|------------------------|-------------------------|
| min. ambient temperature                    | 5 °C                   |                         |
| max. ambient temperature                    | 40 °C                  |                         |
| Degree of Protection                        | IP20                   |                         |
| max. Fuse                                   | 16A                    | Order-No.: 3068.0001.00 |
| min. Fuse                                   | 10A                    |                         |
| max. current                                | 0,8 A                  |                         |
| Power supply requirement                    | 200-240V 1~/2~ 50/60Hz |                         |
| Net weight                                  | 18 kg                  |                         |
| Overall dimensions WxDxH **                 | 280x398x387 mm         |                         |
| max. permissible kin. viscosity             | 50 mm²/s               |                         |
| Pump connection                             | M16x1 male             |                         |
| max. delivery pressure                      | 0,2 bar                |                         |
| max. delivery                               | 8 l/min                |                         |
| Pressure pump                               |                        |                         |
| Cooling power with delta T 20K <sup>1</sup> | 0,8 kW                 | N III                   |
| Cooling power with delta T 15K <sup>1</sup> | 0,65 kW                | 0 0 E                   |
| Cooling power with delta T 10K <sup>1</sup> | 0,48 kW                |                         |
| Cooling power with delta T 5K <sup>1</sup>  | 0,28 kW                |                         |
| Safety classification                       | I / NFL                |                         |
| Operating temperature range                 | (5)(80) °C             |                         |

Technical details and dimensions are subject to change. No liability is accepted for errors or omissions. Illustrations can deviate from the original. Included Accessories:

Connection hoses, hose connector NW12 #6087.

Optional accessories:

Temperature control / - connection hoses, further accessories, etc.: see catalog.

Output data valid for: the given temperature difference Delta T<sup>1</sup> between environment temperature 20°C and return temperature.

In accordance with EN60034-1 the following voltage and frequency tolerances are valid:

Voltage + / - 10%, as long as the frequency tolerance does not run in the opposite direction.

Example: -10% voltage and + 3% frequency -> not allowed !

-10% voltage and -3% frequency -> allowed.

Information to Electromagnetic compatibility: Classification (disturbance) to EN55011: Class A, Group 1

Standard delivery conditions - Power cable configuration:

1. Single / two-phase devices (100V to 240V) --> with power cable and country-specific plug (please specify when ordering)

2. Three-phase devices with current consumption less than 63A --> with cable, without plug

3. Three-phase devices with current consumption greater than 63A --> without cable, without plug

Special Case: Acetone and Polyglycol: The plastic pump is not resistant against acetone and polyglycols (depending on the manufacturer). It is recommended that water is mixed with either glysantine or ethylene glycol for freeze protection. A more resistant plastic is available on request at an additional cost.

\*\* Please respect space requirements. See operating conditions at www.huber-online.com
